

## ANTI-SLIP CARPET AT HIGH ABSORPTION LEVEL

Protective absorbent felt combined with waterproof and anti-slip sheet

The **felt** is made of regenerated cotton with a high absorption level, therefore useful in case of accidental or frequent liquid leakages of different kinds. Colour : white.

The adequate thickness protects the floor from any possible damage caused by contusive tools falling, by frequent passing with dirty shoes and even with forklifts and chairs equipped with wheels.

The reinforcing anti-hair treatment guarantees a high duration and resistance without fraying.

The polyethylene **membrane** which has contact with the floor offers waterproof protection from liquids; the special mixture the membrane is composed of guarantees that the product, once laid on a clean floor, adheres to the surface so preventing any possible movement and avoiding any dangerous dropping of objects by workers.

### Art. P50W

White roll 50 meters long - 100 cm high  
**235** g/square m.  
High adherence

### Art. E50W

White roll 50 meters long - 100 cm high  
**200** g/square m.  
Standard adherence

**Felt** and **membrane** are hot-combined through thermo-melted adhesive which provides a granted resistance against delamination.

Absorption level : 2 litre/square meter.

Differentiated weight g/square m. for each article.
