

Rescueform® MULTISOFT vacuum splints

The extremely flexible film of the MULTISOFT vacuum splints, together with the MICROSPACE filling, allows an exceptionally precise adaptability, which cannot be achieved by conventional materials. The MICROSPACE system is also used for the patient placing in the operating room.

Size: 105 x 68/40 cm, colour: red

Rescueform® Rollboard – the lifting assistance

The Rescueform® Rollboard provides simple but effective lifting assistance meaning considerably less effort for emergency services and care staff – including and particularly for heavy patients. The Rollboard functions like a production line where the outer sheet rolls on the board core and thus transports the patient horizontally. The Rescueform® Rollboard can be stowed under the patient trolley – robust, washable and can be disinfected.

Rescueform® # 5230
Long Rollboard
Foldable transfer aid with 2 handles
Size: 45 x 100 cm
Colour: vibrant yellow

Rollboard carrying bag # 5230t
(without illustration)
for Rollboard # 5230 folded
