Excellence through experience,
For over 75 years.

Light **SOLIS 30**

Simple, usefull, reliable

Wherever you need to conduct a clinical exam, SOLIS 30 will be at your side to guarantee optimal lighting in all situations.

The SOLIS 30 light delivers 92 000 lux at 50 cm, providing ideal illumination for all medical specialities. With faithful colour rendering (CRI 95), the SOLIS 30 is particularly well suited for dermatology. The use of LEDs ensures that the light does not give off heat.

Colors at 4000 K

Colors at 3500 K (halogen lights)

With rail-mounted, and mobile versions available, SOLIS 30 is suitable for all work environments. To make practitioners' everyday tasks easier and avoid maintenance problems, the SOLIS 30 uses LEDs which have a considerably longer service life than halogen bulbs, leaving practitioners free to devote all their time to patients.

USB comes as a standard and can be used as a charger or additional light source

ergonomic handle lets you easily adjust the light

goosneck arm highly increases the manoeuvrability of the lamp

Lights intensity can be adjusted fluently beetwen 15-100%

DESIGN

The round and ultra-flat shape of the light makes the product ergonomic and suitable for any type of installation. Smooth and rounded shape of the dome make it easy to clean and disinfect.

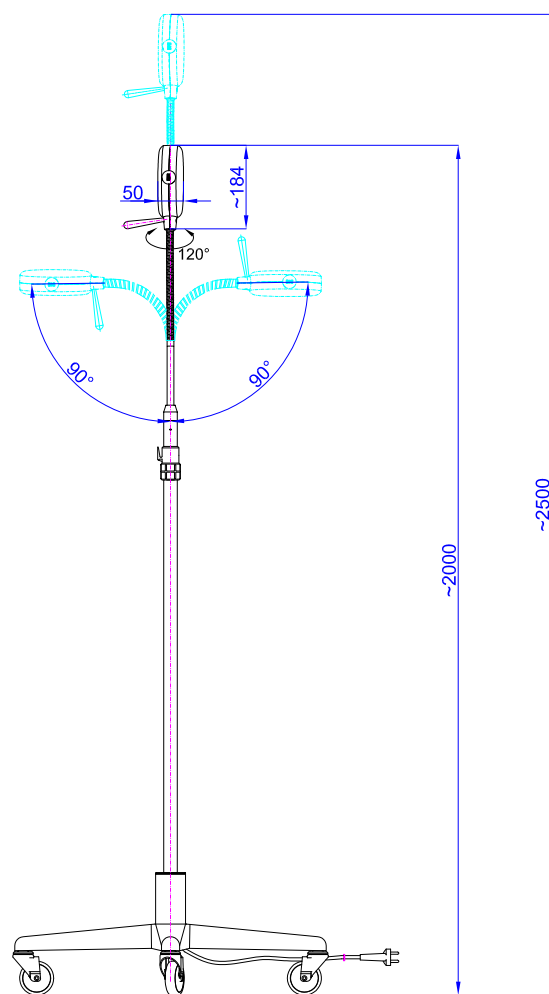

SHADOWS

The radial layout of the lenses and lamp diameter permit shadow suppression and three-dimensional lighting.

Technical data

Light intensity at 0,5 m	92 000 lux
Light intensity at 1 m	30 000 lux
Color temperature	4000 K
Color rendering index (CRI)	95
d 10 light field diameter (1m)	200 mm
control of the illuminance (%)	15-100% (fluent)
Power consumption	10 W
Standards	IEC 60601-2-41
Product class	I
LED life	40 000 h

Solis 30 F - mobile Solis 30 X - rail mounted
